To: Shreyas Gandlur [REDACTED]

Shreyas, Gandlur,

The Peoria Police Department does not possess any documents to request video. These are telephone calls to respective victims. Additionally, no cases have been solved via Ring videos and therefore no prosecutions at this time.

Ring owners were contacted via telephone for requested video. PPD received one video that did not show anything of value to solve any of the cases for 19-16146, 49, 50, 53, 55, 56, 57.

19-17666, RING notified the owner of motion in his driveway. The owner reviewed the video and observed a suspect opening the door of his vehicle and look through it. RING video was provided to the investigating Officer.

19-15320, the owner realized missing money from his vehicle. The owner reviewed his RING App and noticed previous notifications at which time he reviewed the video. The owner observed video of the suspect entering his backyard and approach his rear sliding door. The owner observed the suspect enter the residence and left a short time later. RING video was provided to the investigating Officer.

The Peoria Police Department did not send any requests/subpoenas/warrants to RING. In the cases that were forwarded, they were knock and talks with the residents who had RING cameras. The PPD did send one request to RING for footage from the homicide on Ann (4 year old victim), but were unable to get any footage since the customer did not have a cloud subscription.

Please contact our department if you have any further questions.

Thank you,

Elizabeth Emert
